Tasks/Achievements
- Taught block math classes, assess students' performance, gave feedback, and assigned grades.
- Also, was involved with extracurricular special school events.
- Created an active learning environment for all students to engage and collaborated with fellow colleagues in the respected subject area of mathematics.

PERSONAL PROJECTS

API Capstone Project (Front-End Project) (09/2016 – 10/2016)
- To build this project, I used the following: HTML, CSS, Javascript, and JQuery.
- Because of my passion for cooking and the need to find recipes, I created a recipe application with options for food allergy restrictions and types of preferences people would want to try and explore.
- My Food Recipe Application generates data from an API website called yummly. Here is the link to my project: https://hnnguyen45thinkful.github.io/API-Capstone-Final/

Node Capstone Project (11/2016 – 01/2017)
- I built a passport and authenticated website to log in and create an account for the user to input and store their data.
- With my Budget Tracker Application, this enables users to keep track of all expenses and also balance their various incomes and track their spending.
- Here is the link to my node project uploaded on the heroku application : https://afternoon-reaches-69472.herokuapp.com/

EDUCATION

Full Time Web Development Bootcamp
Thinkful

08/2016 – Present   *New York City, New York*
